LEADING THE WAY TO
A NEW DIRECTION IN
ORAL HEALTH CARE

Direct Mobile Dental Services, Inc.

A New Direction in Oral Health Care

610-664-7795

With increasing competition among long-term care facilities, it's important to consider dental services as part of the benefits your residents receive. Because Direct Mobile Dental Services (DMD) specializes in dentistry alone, we can focus on helping your facility deliver the optimum in oral healthcare. We are committed to becoming your partner in giving your residents the proper attention they need to lead healthier lives.

DMD has been treating geriatric patients for over 20 years. We recognize the obstacles and difficulties the elderly face in their well-being. This awareness enables us to lead you to a new direction in oral health care.

The overwhelming task of managing an effective dental program for your residents while keeping it cost-effective is now within your reach with DMD. We provide a full range of services for your comfort and convenience including:

- General dental services such as fillings and extractions, etc...
- Oral/cancer examinations
- Denture loss program
- 24-hour emergency dental care
- Consultations with other physicians, therapists and specialists
- In-services upon request annually
- Educational training
- JCAHO certification training
- Record keeping and billing (Medicaid participant)

HOW DMD WORKS

Our professionals will work as a team with your employees to provide one-on-one quality dental care. A dentist and hygienist are assigned to care for your residents on a regular basis. That way, you always deal with the same people—professionals familiar with your facility, staff and residents. Each case is handled on a personalized basis to ensure the ultimate result in physical care. Each resident's dental records are reviewed; the present oral condition is evaluated; and consultations take place with physicians, therapists, nurses and other specialists involved with the patient, as needed. Upon completion of an exam, DMD, not the facility, will obtain any treatment authorizations directly from the responsible party.

GENERAL DENTAL SERVICES

Residents can be treated in the privacy of their own rooms. All the convenience of a dental office at your doorstep:

- Dentures
- Relines and repairs
- X-rays
- Extractions
- Hygiene cleanings
- Fillings
- Crowns
- Bridges
- Root canals
- Periodontal therapy (gum treatments)

ORAL HYGIENE AND PREVENTIVE MAINTENANCE PROGRAM

Problems like emergency visits, periodontal disease and infections can be reduced dramatically with some routine measures:

- A dentist conducts an oral assessment of each resident
- A personalized treatment plan is instituted
- Bi-annual checkups and cleanings are scheduled

DENTURE PROGRAM

One of the most common embarrassments for nursing home and assisted living residents is lost or misplaced dentures. DMD Services has an easy solution to this chronic problem—engrave new and existing dentures with the patients' names. Easy, simple and brilliantly cost-effective. Also, as part of our program:

- Dentures are fabricated, repaired and relined
- Staff is trained in denture loss prevention techniques
- Professional courtesy is extended to facilities for payment of lost dentures

JCAHO TRAINING

Our JCAHO program consists of these main items:

- Aid staff to create their own intra-oral assessment kit
- Oral assessment checklist forms supplied
- In-house seminars conducted
- Competency pre-testing administered to ensure employees prepared to pass certification exam

All these procedures can be **BROUGHT STRAIGHT TO YOUR DOOR**, eliminating the discomfort, inconvenience and risks associated with residents traveling outside your facility.

24-HOUR EMERGENCY DENTAL SERVICES

In the event of an emergency, a dentist will attempt to remedy the situation within a 24-hour period. A charge nurse or medical doctor will be contacted immediately regarding medication or treatment to provide relief for the patient. Arrangements will be made to handle the situation as quickly as possible.

- Calls are received and responded to by trained professionals

EDUCATIONAL TRAINING

DMD Services provides in-services for staff members on all aspects of oral hygiene and dental assessments. Topics covered include:

- Daily oral cleaning
- Denture care and loss prevention
- Post-op care
- Recognizing a potential emergency
- Dental assessments

BILLING SERVICES

Our competitive fees make quality oral healthcare affordable. Bills are sent directly to the family members, along with recommended treatment plans. Treatments begin as soon as proper authorization is obtained.

QUALITY ASSURANCE PROGRAM

DMD Services supplies consult sheets and progress reports which are recorded, signed and dated immediately. This process keeps connected healthcare professionals informed. It also helps comply with state and federal regulations, as well as JCAHO. Every facility we service receives a monthly report highlighting the patient treatments we performed the prior month.
